

## **Back Of My Hand**

I'm your biggest fan  
Got your song in my head  
And your poster's above my bed  
You watch me sleeping  
Got a seat for your show  
Couldn't swing the front row  
Could you hear me from the nosebleeds  
Screaming every word?

I want your lies I need your secret  
Will you be mine?  
I wanna know you  
Like the back of my hand

You date the beauty queens  
I see their bodies in magazines  
Sharp jaw size 0 jeans  
I skip a meal  
I drink some tea  
I'm your biggest fan  
Number one til the end  
Do I wanna be you or be your friend?  
There is no telling

## **Sand Angel**

Waking up from a dream  
Where you hold me kiss me  
And I can't fall back asleep

In your arms  
Grind my teeth  
As you toss me turn me  
And I'm sweating through the sheets

Sand angel  
She's the sand angel

## **Stay In the Car**

She's got a Chevy  
Double parked with the doors swung wide  
FM preacher the radio's high

Hair in a tantrum  
Eyes like two shrieks of fire  
To her boyfriend behind the wheel

She says  
"Stay in the car and I'll grab what you want"  
She says "stay in the car"

I wanna know her  
I want us to get along  
Be the ice cream left out in her sun

Plug into the speaker  
And put on her favorite song

Run the AC and sing along

She said

“Stay in the car and I’ll grab what you want”

She said “stay in the car”

She burns out of the market  
Plastic bags digging into wrists  
Blood stuck in her fingertips

Fuming impatient  
Pop the trunk slam the door peel off  
Cloud of smoke left where she just was

She said

“Stay in the car and I’ll grab what you want”

She said “stay in the car”

### **Went Out Without You**

I’ve never loved you more than I do right now  
And I do right now and I do right now and  
I fear what would happen if you didn’t care  
If you didn’t care at all

When we share a bed  
You kick me all night long  
Kick me all night long kick me all night long  
But I would never tell you  
Cuz I do not care  
No I do not care at all

I went out without you  
Tried to make new friends tried to make new friends tried to make new friends but  
I was too embarrassed  
When I showed up there  
When I showed up there alone

When you called me after  
I was so beat down  
I was so beat down I was so beat down  
But I picked up and told you  
I had a great time  
Said goodnight and hung up the phone

### **Spin Out**

You’re a grown man  
You stand out  
Nobody else could ever know  
Your paper hands  
You cut out  
You’re always searching

I’ve seen the world spin out  
In a slow burn  
A slow burn

You’re broken  
You’ve ruined

No memory can be replaced  
You've stolen  
My best friend  
No space left  
We'll dive in  
Take what's left  
A godsend

### **Anything At All**

Stuck to her door  
Like a fly in her web  
The foot of my bed  
Shaking with her step  
She's forever approaching  
I'm forever in dread  
Wrap me in silk and bite off my head

I should I shouldn't I shouldn't say  
Anything at all Anything at all

How do I know if I'm caving in?  
Pinching out the flame until it sings me  
When I talk there's a devil  
Making me so profane  
And every dirty word becomes your name

I should I shouldn't I shouldn't say  
Anything at all Anything at all

### **Moon**

You've been away for a week or two  
After everything that we've been through  
Slept on your side of the bed again  
Talk to the moon just to have a friend  
Do you kinda miss me when I feel insane?  
Save a smile for another day  
I'll let you know when I've had enough  
Won't take a hit for the both of us

On the couch and we're full of love  
You're coming down and I'm staring off  
The window's open and I see you too  
A second chance when I think of you

### **Sick of Spiraling**

Walking alone at night  
Clutching a cheap gas station knife  
But the danger was in the car  
Who didn't see me it was too dark  
As the brakes slammed to the floor  
Missing me just inches short  
I thought if I can't have my own back  
How the fuck can I have yours?

You are a braving light in a world so dark  
And I'm sick of spiraling out

And I need your touch to stop  
You are a braving light in a world so dark  
And I'm scared out of my mind  
And I need your love oh I need your love

Drivin on to the next town  
Keeping the rubber side down  
But the danger is in my phone  
And the drug of an endless scroll  
Call you back at the roadside  
You say you're staying in tonight  
You're cryin  
"If you can't have your own back  
How the fuck can you have mine?"

You are a braving light in a world so dark  
And I'm sick of spiraling out  
And I need your touch to stop  
You are a braving light in a world so dark  
And I'm scared out of my mind  
And I need your love oh I need your love

### **Aurora**

Look up it's Aurora in the sky  
Buzzing jerking he sees through her eye  
Slicin' up my homesick reverie  
From way up there the treetops are just  
Pilling in the sheets

The blood  
The stream

Mid October bored in North Conway  
Starting up a ball game  
Making the rules up as we play  
He said the ball was once a C list movie star's  
I miss it cuz I'm laughing  
It gets stuck under a car  
And I took the joke too far again  
Again

The blood  
The stream

### **Domin' Sun**

End of the earth will set it free  
But we've got time  
And you are holding me  
We gave our bodies to the birds and bees  
And now they're falling from the sky  
In threes

And I tan easy in the domin' sun  
You say "At least it's warm  
At least we're young  
We're all fangs rooted in a demon's head  
And now we're sinking in"  
The sky is red

But we've got time and you are holding me  
End of the Earth will set it free
